

# 2025 Solar Storage Inverter Shipments

o An increase in battery storage might explain the leveling off of storage curtailment as a percent of solar production. o Though not possible in many cases due to transmission constraints, California has ...

The global solar inverter industry is projected to contract over the next two years, according to analysis from Wood Mackenzie. The firm forecasts that worldwide inverter shipments will contract by 2% in ...

Strong shipment numbers translated into a 12% sequential revenue increase and a 7.4% year-on-year rise, with Q1 2025 revenue reaching \$219.5 million, up from \$204.4 million in the previous year.

One of the significant trends over the last few years has been the rapid growth in sales of hybrid inverters which are targeted at roof-top solar installations and in particular at residential installations.

In Q1 2025, China's market showed steady growth, the U.S. market saw front-loaded shipments, and emerging markets gained momentum, driving global energy storage system shipments to a record high of 71.5 GWh.

The African Development Bank's Desert-to-Power initiative is spurring procurement of containerized solar-storage systems. Exporters from Asia and the EU have secured large tenders involving 3-phase off-grid ...

Global energy storage shipments jumped 84.7% in the first three quarters of 2025, with Tesla and Chinese manufacturers leading the charge, says InfoLink.

The global solar inverter market will contract for two consecutive years, declining 2% to 577 GWAC in 2025 and a further 9% to 523 GWAC in 2026, according to Wood Mackenzie's latest reporting.

Non-China shipments exceed half; Chinese players dominate, Korean players stabilize In 2025, energy storage cell shipments to non-China markets totaled 299.79 GWh, accounting for approximately ...

PCS shipments for front-of-the-meter (FTM) energy storage projects account for more than 50% of global shipments during the forecast period (2023-30), with the majority of shipments coming from the ...
