

# Abb marine and ports energy storage

The Containerized ESS brings new simplicity to energy storage retrofitting, with all batteries, converters, transformer, controls, cooling and auxiliary equipment pre-assembled in the self-contained unit for ...

"Fuel savings, lower emissions and increased safety during operation and maintenance are the demand drivers for energy storage systems in the newbuild ship market, where ABB has extensive experience.

ABB Marine & Ports division reported strong late 2025 activity, with contracts for hybrid-electric ferries from BC Ferries and Washington State Ferries as well as the world's largest shore ...

ABB offers a comprehensive range of power converters and controllers designed for various applications across different industries. These products help customers generate and utilize energy efficiently, ...

In response to growing demand for low and zero emissions power sources in marine applications, ABB said it has developed Containerized ESS - a complete, plug-in solution to install ...

ABB's Energy storage system is a modular battery power supply developed for marine use. It is applicable to high and low voltage, AC and DC power systems, and can be combined with a variety ...

ABB's containerized energy storage solution is a complete, self-contained battery solution for a large-scale marine energy storage. The batteries and all control, interface, and auxiliary equipment are ...

ABB's containerized energy storage system is a complete, self-contained battery solution for large-scale marine energy storage. The batteries and all control, interface, and auxiliary equipment are delivered ...

In response to growing demand for low and zero emissions power ...
