

# Analysis of the current status of photovoltaic panel exports to the EU

Although the EU remains a net importer of solar panels, in 2023 it exported EUR900 million worth of solar panels, mainly to Switzerland and the UK, and smaller quantities to countries such as ...

It was confirmed by coefficient variation. Although export shares in world exports of photovoltaic panels increased over 2007-2018, the group included countries whose export share of ...

In line with the mission of ESMC, an annual study has been conducted in recent years to provide an overview of the central PV cell and module trade flows in and out of Europe.

In this context, this Policy Brief evaluates specifically the case of solar PV manufacturing. We start by describing the characteristics of solar PV supply chains, and then outline the diverging ...

The EU solar sector continues its upward trajectory, with mid-2025 figures confirming robust growth. SolarPower Europe's latest analysis highlights record installations, policy momentum, ...

As part of the Clean Energy Technology Observatory (CETO), this report on Photovoltaics (PV) is built on three sections: the technology state of the art, future developments and ...

The report provides a detailed year-by-year analysis for 2024 and a forecast extending to 2028, covering market growth scenarios under different policy environments, investment trends, and ...

The EU solar PV market in 2024-2025 stands at a pivotal moment, influenced by policy-driven growth, persistent pricing pressures, and shifting global supply dynamics.

As solar has become a major pillar of the EU energy transition, it's important to continuously feel the pulse of the EU solar sector. Our comprehensive outlook with five-year ...
