

# Armenian solar power generation system

According to the public reports of PSRC, as of July 2025 there are 84 commercial solar PV plants with total 369 MW installed capacity operating in Armenia, of which 62 plants (260.4 MW) ...

Armenia's solar sector saw record growth in 2025, adding 615 MW to reach 1.1 GW total and meet a key 2030 national energy target five years ahead of schedule.

Meta Description: Explore how the Gyumri Photovoltaic Solar Power Generation System in Armenia leverages cutting-edge solar technology to meet energy demands. Discover project insights, industry ...

According to data by the Public Services Regulatory Commission (PSRC), the country's utilities regulatory body, Armenia has 75 operating utility-scale solar farms with a total installed ...

Armenia's focus on solar energy is a core component of its strategy to reduce dependence on imported fossil fuels and bolster national energy security. Currently, the country's ...

In recent years, the field of solar energy in Armenia has developed rapidly, solar power plants with a total installed capacity of 1,045 megawatts are already connected to Armenia's power ...

In 2019, the European Union announced plans to assist Armenia towards developing its solar power capacity. The initiative has supported the construction of a power plant with 4,000 solar panels ...

The number of household solar power plants grew by 60% in 2025, according to an Armenian press briefing, while their capacity grew by 52% year-on-year.

Solar energy production in Armenia has reached a new level. Armenia continues to actively expand its solar energy sector, aiming to increase the share of renewable energy production ...

Armenia's geography provides an ideal setting for solar power generation, with over 2,500 hours of sunshine annually. Recognizing this potential, the government introduced policies and ...
