

Bloomberg says solar power

See the latest on Solar Power. From breaking news to in-depth reporting, Bloomberg tracks the full story in real time.

Solar power is set to dominate global electricity markets within the next few decades, and may have already reached an "irreversible tipping point," according to a study published this week in ...

BNEF finds that utility-scale solar photovoltaic investment was particularly hit, falling 19% compared to the first half of 2024. The markets that saw the largest year-on-year declines in ...

Solar PV and energy storage technology will need policy support to reach "economically optimal" levels for the global energy transition, according to the latest forecast by Bloomberg New ...

Global financial, technology and media company Bloomberg has agreed to buy 80% of the solar power output associated with a 40-MW wind-solar hybrid park that is being developed by EDP ...

BloombergNEF's revised outlook now projects a 23% drop in new wind, solar and energy storage additions through 2030 versus the 1H 2025 base case. Technologies fare differently within ...

Solar installations are set to slow next year for the first time since the industry emerged as a global force two decades ago, as policy shifts and saturation in major markets temper demand.

Despite the generous tax breaks they are receiving from the Biden administration, many US companies planning to build solar factories can expect to suffer severely or fail altogether, ...

The global energy agency said last year it expected the US to add 500 gigawatts of new capacity -- almost all solar and wind power -- by 2030. But it now expects it to add 250GW.

BloombergNEF says in a new report that solar and wind must drive most emissions cuts before 2030 to stay on track for net-zero by 2050. Its net-zero scenario targets a combined solar and ...
