

Blown fuse in circuit breaker in Singapore

Can a blown fuse be replaced with a higher breaker?

It is very dangerous to replace the blown fuse or faulty circuit breaker with a circuit breaker that has a higher rating. If the wiring in that circuit is not the appropriate rating/size for that higher rating, the excessive current carried will cause overheating or electrical fires.

What is a blown fuse?

A blown fuse occurs when a fuse in your electrical circuit gets overloaded and "breaks" to stop the flow of electricity. This is a safety mechanism to protect your home from electrical fires or damage.

Why are circuit breakers important in Singapore homes?

In Singapore homes, circuit breakers serve as crucial safety devices that protect electrical circuits from overloads and short circuits. They are the most important components of our Distribution Board (DB) Box or Electrical Panel.
