

On 17 Sept in Brussels, the third clustering event "Bridging Policy, Research, and Industry: A Transversal Workshop on Solid-State Batteries" of the Solid4B Cluster gathered Horizon Europe...

Donut Lab says its all-solid-state battery is already in production, offering better fast charging and energy density than today's lithium-ion packs.

Battery cell fabrication know-how is key to performance development. Thanks to our newly build dry room, we are working towards a scalable and optimized fabrication process for all-solid-state batteries.

Solid-State Batteries Race to Mass Production With differing technologies, Toyota, Samsung SDI, QuantumScape, and others are vying for breakthroughs in solid-state batteries for ...

Verge Motorcycles is developing what it claims is first production solid-state EV, using a battery from newcomer Donut Lab. But the company can't sell the bikes before they get safety ...

Donut Lab, a Finnish startup specializing in electric mobility, has announced the launch of what it claims is the first solid-state battery designed for vehicle production, presenting the innovation ...

It offers a unique opportunity to gain early access to new knowledge, connect with peers, and actively contribute to the evolution of the solid-state battery landscape in Europe.

Expert analysis compares Donut Lab's solid-state pitch to pseudo-capacitor behavior and real cycle life data, helping you spot red flags fast.

Belgian battery technology specialist Syensqo and French energy solutions provider Axens have teamed up to launch a new company looking to scale up the development of solid-state ...

Solid-state EV batteries, deemed the "holy grail" of battery tech, are moving from the lab to reality, even in the US. Factorial launches solid-state battery program in the US Factorial Energy ...
