Solar Generator Spreadsheet by City Prepping Get My "Solar Generator Guide" To Help Choose The Right Generator Sign up now to access my FREE "Solar Generator Spreadsheet" to help you choose the right generator based on your unique situation and energy needs. It takes about 5-hours to completely charge the generator.

Where should you install a solar generator?

Australia and the southwest parts of North America appear to be ideal locations for solar, while Ireland and the U.K. and parts of China would present some distinct solar challenges. But just because you don't live in an ideal area for daily sunlight doesn't mean that a solar generator is out of the question.

What is a power save on a solar generator?

The power save on a solar generator is similar to the automatic shut-down or sleep feature on a computer that saves power when the device is idle and not in use. A battery's depth of discharge (DoD) indicates the percentage of the battery that has been discharged relative to the overall capacity of the battery.
