

Cuban phase change solar energy storage cabinet system

In February 2025, just before the inauguration of the Cotorro solar park, the country experienced blackouts that affected more than 56% of the island at once, forcing authorities to ...

Cuba aims for solar energy growth, but lacks essential battery storage. Explore the challenges and solutions. Act now for change!

According to information provided by the Cuban newspaper Granma, only four of the projects that will be operational this year have a 50-MW battery storage system.

On Saturday, Cuba initiated the installation of solar energy storage batteries at four electrical substations, marking a significant step in addressing its energy challenges.

Welcome to Cuba's energy paradox. With its aging power infrastructure and reliance on imported fossil fuels, Cuba's push for energy storage solutions isn't just trendy--it's survival.

In the midst of a persistent energy crisis causing widespread power outages across the country, the Cuban government has pledged to add 1,200 megawatts (MW) of photovoltaic ...

You'd think an island blessed with year-round sunshine would've cracked the code on renewable energy storage. Yet Cuba's power outages increased by 23% in 2023 despite adding 450MW solar capacity.

By 2025, 200 MW of battery systems will be installed to store solar energy, key to stabilizing the grid. Containers are already in Cuba, awaiting assembly.

ATESS is playing a key role in Cuba's renewable energy transformation by offering advanced energy storage solutions that address grid instability, enhance energy independence, and maximise the use ...

The Cuban government announced that before the end of 2025, there will be 51 photovoltaic parks operating in the country, of which 32 are already synchronized with the National ...
