

What can you expect from us? In the form of battery storage, we will provide you with the functioning of the essential infrastructure necessary for the operation of your facility. Our solution is suitable for ...

SolarEast BESS energy storage systems feature multi-layer protection -- including thermal management, fire suppression, and remote fault diagnostics -- to prevent thermal runaway ...

With EUR279 million EU funding pouring into its grid modernization [1], the Czech Republic is rewriting its energy playbook. Let's explore how this Central European nation is becoming a testing ...

In 2026, the Czech government officially rolled out a series of specialized regulatory policies for BESS, establishing a comprehensive framework covering three key dimensions-grid ...

To meet the demanding requirements of the Czech grid, AlphaESS is supplying the Aster 5000, a 5MWh liquid-cooled energy storage system designed for reliability, rapid deployment, and...

It will be open to all energy storage technologies that are directly connected to the transmission or distribution network, and will support the European Commission's 2024-2029 ...

It can absorb energy to cover the daily consumption of 1,300 households and at the same time contributes to stabilising the grid and ensuring the required electricity parameters. Thanks to its ...

In early 2025, the Czech Parliament approved new legislation enabling stand-alone battery storage systems to be connected directly to the grid - something that was not previously ...

This article explores how cutting-edge storage technologies are addressing grid stability challenges while unlocking new opportunities for businesses and communities.

The hybrid energy source, Energy nest, with a total current output of 30 MW to the grid, represents such a solution by combining gas turbines and battery storage, and opens a range of ...

Czech safe energy storage system
