

Disney Microgrid

The award-winning project was developed for Disney Cruise Lines and consists of three solar-powered microgrids at the Disney Lookout Cay destination at Lighthouse Point, Eleuthera, Bahamas.

This year, we brought online a new 270-acre, 50+-megawatt solar facility near Walt Disney World Resort, built in collaboration with the Reedy Creek Improvement District and Origis ...

See how Disney's microgrid project with ELM MicroGrid earned recognition for clean energy innovation at CREF 2025.

This project is three separate microgrids that offset over 90% of the diesel fuel consumption at the cruise ship destination island.

Amazon, Disney and Netflix are all piloting alternatives that produce less emissions and local air pollutants. Many of the technologies are also quieter, which means they can be placed ...

This award-winning project--recognized as the 2025 CREF Microgrid of the Year--features three independent solar-powered microgrids designed to serve the entire island, dramatically reducing ...

ELM MicroGrid Powers Award-Winning Project for Disney at 2025 CREF Ceremony ELM MicroGrid helps power Disney's award-winning solar microgrid at Lookout Cay, cutting diesel use by 90% and ...
