

Distribution map of solar power plants across the country

From California's vast solar farms to Texas wind installations and Pennsylvania's coal plants, explore the diverse energy landscape that powers America.

This map contains multiple layers showcasing solar infrastructure within the US. The map visualizes solar power plants, electric power transmission lines, and the photovoltaic (PV) ...

The database currently contains data for nearly 3,700 U.S. large-scale solar facilities across 47 states plus Washington, D.C. that became operational between 1986 and the end of 2021.

Data and information about Solar power plants and their location plotted on an interactive map of United States of America.

This map displays information on location, fuel type, electric generation, generating capacity, ownership, and emissions for over 10,000 power plants across the country.

This analysis service identifies and prioritizes distributed energy projects at a single site or for multiple sites across cities, states, or countries, each with its own energy requirements, resources, goals, and ...

Interactive U.S. Solar Farms & Solar Parks Map showing plant boundaries, owners, nameplate capacity (MW), and power output. Based on EIA-860/860M/923. Filter by utility-scale photovoltaic and CSP ...

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

The Global Energy and Renewables Map is an interactive web map where you can explore global power plants and U.S. solar and wind projects.
