

Egypt Solar Ecosystem Project

The Obelisk Solar Project is a landmark hybrid renewable energy development in Egypt that is set to become one of Africa's largest solar-plus-storage facilities. The solar project is located in ...

Here where temperatures rise past 40°C, sits Africa's largest solar installation. Benban Solar Park stretches across 37 square kilometres housing over seven million photovoltaic panels that ...

He announced that a number of solar panel manufacturing plants will begin actual production in the first quarter of 2026, with a local content ratio ranging between 80 and 90 percent, ...

Launched in 2018 with the commissioning of the first photovoltaic plant, this mega-project has been integrated into the strategy developed by the Egyptian New and Renewable Energy Authority. The ...

Egypt's first large-scale hybrid solar and battery plant has begun construction as the country looks to its abundant sunshine to help fix its energy crisis. Obelisk, located in Nagaa ...

In the deserts near Aswan, Egypt the Benban Solar Park stands as one of the world's largest renewable-energy experiments -- a massive solar ecosystem that behaves less like a single ...

In this edition of the Weekend Read, we turn to Egypt. The gigawatt-scale Benban project showcases the North African country's solar potential, and premium prices for gas exports make the ...

Get the latest Egypt solar energy news. Discover how projects in Benban, Aswan, and Zaafarana are helping Egypt meet its ambitious 2035 renewable energy targets.

GCC's first African project, Benban Solar Park generates 200 MW solar power in Egypt, reducing 285,050 tons of CO₂e emissions annually through clean energy.

Egypt is set to construct Africa's largest solar energy and battery storage facility after securing a \$184.1 million financing package from the African Development Bank (AfDB).
