

Group 24 vs 34 battery

Hello, It's time for a new battery for my '15 Outback, 2.5L. Yes, I want to upgrade. I've read that specific group 34 and 24 batteries will fit. What I can't find is if all batteries in these groups ...

In the many battery threads here with their tales of woe, a common theme for upgrading seems to be using a group 34 battery. I found this chart with battery dimensions: BatteryWeb, Inc. - ...

Both Group 24 and Group 34 batteries serve similar purposes but differ in price and efficiency. This section breaks down their cost and value to help decide which suits your needs best.

I still think the regular Group 24 is a solid choice because it had the highest reserve capacity with only slightly lower CCA than a Group 34. But if a basic battery is enough I guess you ...

Group 34 and group 24 are both drop-in substitutes for the group 25. Group 24 is slightly longer so the OEM battery jacket won't fit it without modification, but it fits perfectly in the Outback's ...

Do not buy a 24F for an Outback! The Group 24 is a perfect fit, the 24F is a kludge. However the 24F might be just what the Odyssey needs. If your Outback needs a battery then don't ...

It appears that a group 24 battery would not only be a better fit, but there is a wider assortment of available batteries (flooded and AGM) at different ...

Either a group 24 or 34 will be an upgrade from the weak oem battery. I chose the group 24 Walmart Maxx with 770 CCA & 130 reserve min. 3 year replacement & additional 2 year pro rated ...

Group 24 and Group 34 batteries are similar but not the same; they differ in dimensions, capacity, and power output. While both serve automotive, marine, and RV applications, Group 34 ...

Jan 7, 2026; When purchasing a battery, you will see a series of numbers and letters in the name. These numbers and letters are the BCI group ...

Below we look at a Group 24 vs. 34 battery and why you should consider each one for your vehicle. This will help ensure that you choose the right one to provide you with all the power that ...

BCI group numbers define a 12-volt battery's physical dimensions and terminal layout only. A group 24 battery is identical in height to the OE group 25, while a group 34 is ~22 mm (7/8 inch) ...

Apr 4, 2025; Are you looking for a marine, RV, automotive, or solar PV battery? You may have heard

Group 24 vs 34 battery

common terms like a "group 24 battery" or "type 27 marine battery." Then our battery ...

When it comes to selecting the right battery for marine, RV, or automotive applications, understanding the distinctions between Group 24 and Group 34 batteries is crucial. This detailed ...

The OE battery is BCI Group 25, but a Group 24 will fit, and it will usually have slightly higher capacity. A Group 34 is another possibility, but it's shorter (vertically) than the Group 25 or 24.

Learn how Group 24 and Group 34 batteries differ in size, weight, cranking amps, reserve capacity and warranty. See how OPTIMA BLUETOP batteries ...
