

International Wind Power Plant

The world's installed wind power capacity now meets well over 10% of global electricity demand - and much more than nuclear power. More than 30 countries now have a share of wind ...

The Global Wind Power Tracker (GWPT) is a worldwide dataset of utility-scale, on and offshore wind facilities. It includes wind farm phases with capacities of 10 megawatts (MW) or more.

Explore the top 13 largest wind farms in the world by capacity, with key facts, stats, and global clean energy insights.

Discover the largest wind farm projects globally. Learn about their impact, capacity, and future expansion plans, driving the shift towards sustainable energy solutions.

The top wind power companies supporting and developing renewable energy projects globally include Siemens, NextEra Energy, GE Vernova and Enel

Large-scale wind farms around the world are harnessing the power of wind to generate electricity for millions of homes and businesses. In this article, we will explore the ten largest wind ...

Data and information about power plants and their location across the globe, plotted on an Interactive world map

Wind farm construction companies are central to the global shift toward clean power. Their projects, investments, and long-term development pipelines will determine how quickly the world can scale ...
