

J4125 solar telecom integrated cabinet inverter automation micro industrial computer

An Industrial fanless Embedded Box PC Intel J4125 by ITD are compact embedded box PCs, designed for edge computing, machine vision and other industrial applications. They offer a wide range of I/O ...

Our Industrial Mini PC J4125 is designed to deliver stable performance, low power consumption, and durability in harsh environments. Powered by the Intel®; Celeron®; J4125 processor, it supports ...

MPCX-J4125-6COM, Intel®; Industrial embedded Computer Model: MPCX-J4125-6COM Industrial Embedded Computer with Intel®; Celeron®; J4125

Intel Celeron Quad Core processor Fanless Industrial Computer, Intel Celeron J4125 Quad Core processor Quad core quad threads Fanless computer, Small size, durable cpu performance, Applied ...

Main products cover mini PC, HTPC, embedded PC, vehicle computers, industrial computers, fanless systems, aluminum cases, ITX motherboards, DC power boards, hardware and computer-related ...

Harness productivity with the J4125 Fanless Mini PC. Perfect for rugged environments, it delivers reliable performance in compact form.

With a variety of high-definition display interface to meet the needs of a variety of applications interface to provide a variety of work efficiency, widely used in industrial control, military, communications, ...

It's designed as palm-sized, fan-less and ruggedized computing solution dedicated to thin client, POS, KIOSK, smart factory automation, industrial controller system and space-limited applications, with ...

The Slim Fanless Industrial PC driven by a Gemini Lake CPU is jammed packed full of features. 4K Resolution HDMI+DP, 2 LAN+Wi-Fi+SIM, PCIe x2+MiniPCIe, 2 ...

OAI - Quiet cooling J4125 mini industrial computer manufacturer & producer based in China, we operate from a factory with extensive experience. We invite you to explore OEM and ODM solutions with us.
