

Latest price trend of Yingli photovoltaic panels

Are Yingli solar panels good?

Happy end is in sight: we happily report that the PV modules from the Chinese company panels are good once again and you'll learn more about them in our Yingli Solar panels review. Yingli Solar was founded in 1998 and is headquartered in Baoding, China. It quickly became one of the top players on the market.

Who makes Yingli solar panels?

It has grown rapidly over the years and has shipped more than 24 GW of panels to over 100 countries. A publicly-traded company (NYSE:YGE), Yingli is one of the world's largest solar panel manufacturers, and at its peak has been the largest panel supplier. The company produces over 4 GW of solar panels every year.

Does Yingli Solar offer bifacial solar panels?

Yingli Solar offers panels for all kinds of projects: there are panels for making a home system and there are high-output PV modules for building a solar farm. Chinese engineers seem to really like bifacial modules: half of Yingli Solar products are panels with an active rear side which are called Panda.

How much power does a Yingli solar panel produce?

Yingli offers a wide variety of PV module sizes in terms of power ratings. Its smallest panel can generate a peak power of 325 W, but the largest one can churn out an impressive 670 W in ideal conditions (STC). To put things in perspective, around 400 W power output has been considered somewhat typical in recent times.

In a new weekly update for [pv magazine](#), OPIS, a Dow Jones company, provides a quick look at the main price trends in the global PV industry.
