

Location of solar power stations

Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for selected sites. The Global Solar ...

Get to know the projects' power generation capacities in MWp or MWAC, annual power output in GWh, state of location and exact location on the map, name of developer, year of connection to the electric ...

The table does not include the projects under construction or development, but it is regularly updated, so you can always find the most recent information here, including location, capacity and year of grid ...

They are different from most building-mounted and other decentralized solar power because they supply power at the utility level, rather than to a local user or users. Utility-scale solar is sometimes used to ...

To access additional data, including an interactive map of global solar farms, a downloadable dataset, and summary data, please visit the Global Solar Power Tracker on the Global Energy Monitor website.

The construction of solar photovoltaic power stations occurs in various locations around the globe, driven by factors such as radiation levels, land availability, and regulatory frameworks.

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (<1 ...

Data and information about power plants and their location across the globe, plotted on an Interactive world map

The following is a list of photovoltaic power stations that are larger than 500 megawatts (MW) in current net capacity. [1] Most are individual photovoltaic power stations, but some are groups of co-located ...

The United States Large-Scale Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U.S. photovoltaic (PV) facilities with capacity of 1 megawatt or more. It includes ...
