

Megawatt-scale battery energy storage in India

The Adani Group on Tuesday announced its strategic entry into the Battery Energy Storage Systems (BESS) sector with a pioneering 1126 MW / 3530 MWh project, marking one of the ...

BESS Project In India: ENGIE has made significant strides in the renewable energy sector by securing its first Battery Energy Storage System (BESS) contract in India, a 280 MW facility ...

"This first large-scale battery storage project in India marks a decisive step for ENGIE in a fast-growing market for renewables and storage. It illustrates our commitment to accelerating the ...

The Bihar government has signed an MoU to procure electricity from a significant solar power project in Lakhisarai, featuring a 301 MW capacity and 523 MWh battery storage. Expected to ...

Explore the top 10 BESS companies in India driving grid stability, renewable integration, and energy storage growth through policy support and large-scale deployments.

The GEAPP Leadership Council (GLC) today officially announced the launch of India's first utility-scale, standalone BESS project.

A Battery Energy Storage System (BESS) is a cornerstone of the modern power grid, improving flexibility, reliability, and sustainability. While Lithium-ion currently dominates due to its ...

With IFC's support, we are proud to lead the deployment of one of India's first and largest BESS assets in Gujarat. This project represents a strategic milestone in building next-generation ...

BSPGCL signs MoU to procure power from India's largest 301 MW solar project integrated with 523 MWh battery storage at Kajra, Bihar, strengthening round-the-clock green power supply and ...

Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications. However, only about ...
