

Slovenia is taking a significant step towards expanding its renewable energy capacity by introducing a new regulation to streamline the funding of large solar and wind projects.

The Slovenian government has opened an investment call with a budget of EUR 29.5 million (USD 34.3m) to co-finance projects for the adoption of wind, solar and energy storage capacity.

The ministry will provide grants for the construction of solar power plants with a capacity of 1 to 6 MW and wind power plants with a capacity of 1 to 18 MW, it said in a statement on Friday.

The major advantage of solar / wind hybrid system is that when solar and wind power production are used together, the reliability of the system is enhanced. Additionally, the size of battery storage can ...

Currently there are no geothermal power plants (GPP) in Slovenia, but the potential does exist. The geological and tectonic environment of Slovenia is quite complicated, as it is divided into several ...

Slovenia's Ministry of the Environment, Climate and Energy has published an investment call to co-finance solar and wind power projects granted priority status. A total EUR29.5 million is...

The goal of the call is to increase the share of renewable energy in Slovenia's energy mix in order to help the country reduce its dependence on fossil fuels and develop a reliable energy storage ...

Solar and wind power projects with or without energy storage that are on Slovenia's priority list can be submitted for grants from the European Union's Modernisation Fund. The round is ...

Slovenia has amended the grant scheme for the period 2025-2029, supporting the construction of new solar and wind power plants.

Mobile wind and solar power in Slovenia
