

New energy storage field capacity

As renewable energy sources like wind and solar become mainstream, the need for efficient storage solutions has skyrocketed. In 2024 alone, China's installed capacity of new energy storage systems ...

We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U.S. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory report. This amount ...

Covering about 200,000 square meters, the new energy storage project attracts a total investment of 1.45 billion yuan (\$200 million). Up to 10,000 Megapack units are scheduled to be produced ...

Energy storage installations globally will keep gaining momentum over the next decade as other markets pick up pace. BloombergNEF expects cumulative energy storage capacity in 2035 to reach 2 ...

A zero-carbon future by 2050 would require 930 GW of storage capacity in the U.S. 33, and the grid may need 225-460 GW of long duration energy storage (LDES) capacity. 34 Hydrogen, CAES, and PHS are the most ...

Battery storage in the power sector was the fastest growing energy technology in 2023 that was commercially available, with deployment more than doubling year-on-year. Strong growth occurred for utility-scale battery ...

A majority of all new generation capacity under development is for solar energy (55%), followed by wind (26%) and natural gas (11%). However, over two-thirds of the wind capacity is in the proposed stage, which is the ...

In Q2 2025, a record 5.6 gigawatts (GW) of new capacity came online, according to the latest US Energy Storage Monitor report from the American Clean Power Association (ACP) and Wood...

The battery energy storage market continues its rapid growth, reshaping power systems worldwide. After a historic 2025, when global BESS capacity surpassed 250 GW and overtook pumped hydropower, ...

California and New York led Q2 CCI storage installations, accounting for over 70% of total capacity, while Illinois gained traction. Community storage deployment remained limited due to high costs ...
