

Clifton Park, New York, has formally banned battery energy storage projects within the town, closing the door on future installations and signaling a growing tension between local safety ...

A boom in battery storage has bolstered the demand outlook for lithium in 2026, driving hopes for an accelerated turnaround for an industry struggling with oversupply.

Government Market News | Mary Scott Nabers Insights | Battery storage projects surge as utilities prepare for next grid era in 2026 | Battery storage projects nationwide are accelerating ahead ...

Get the latest updates on battery tech, grid-scale storage & green energy - with trusted news, trends & expert commentary

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage ...

Here are ten notable innovations taking place across different energy storage segments, as highlighted in GlobalData's Emerging Energy Storage Technologies report.

Energy storage is expected to play a significant role in enabling the global data centre build-out, although the commercial and financing models developers will use are evolving, Energy ...

Ford pulls back from large battery-only electric vehicles to concentrate on hybrids, smaller, affordable EVs, and grid-scale battery storage. CES, PowerGen, APEC, and DTECH will spotlight solutions for ...

Energy storage solutions, including battery plants and long-duration storage systems, can make solar and wind energy available when it's needed most.

Ford will convert plants in Kentucky and Michigan to produce lithium iron phosphate batteries, including 20-foot DC container systems of the type used by data centers, utilities and large ...
