

Off-grid cost of foldable shipping containers used in US farms

What is container farming?

In the decade since then, container farming has evolved into an important subset of the indoor agriculture industry. Used or purpose-built 40-foot containers are used as shells to house hydroponic farms which can be set up vertically or horizontally. The containers are climate controlled and use indoor growing lights to replicate the sun.

What are the advantages of a container farm?

Container farms have many unique advantages over other types of indoor farming (like greenhouses and warehouses). The primary advantage is the small-space design, which allows people to grow food without needing access to large amounts of land. This makes it an ideal format for urban spaces where square footage is at a premium.

What is a Greenery S shipping container?

While the container is purpose-built specifically for Freight Farms, it is designed with the same dimensions and materials as standard shipping containers, making the Greenery S just as easy to transport anywhere in the world.
