

Outdoor power plug-in hybrid vehicle

What is a plug-in hybrid electric vehicle?

Plug-in hybrid electric vehicles, known as PHEVs for short, are similar to normal hybrids, but their electric motors are usually more powerful, the high-voltage batteries are bigger and they have a charging port, so you can charge them at home just like an EV.

Are hybrid SUVs good for camping?

Many hybrid SUVs will also let you run the air conditioning and heat all night off the battery while others even come with power outlets that will let you run small appliances, making them ideal options for car camping. In this article, we'll take a look at some of the best hybrid SUVs for camping and enjoying the great outdoors. 1.

Should you run a plug-in hybrid car?

Think of running a plug-in hybrid car as having the best of both worlds. You see, not only do you get to take advantage of the low running costs of electric power, but you've got the reassurance of a traditional combustion engine for when your battery has run out of juice.

What is a plug-in hybrid SUV?

Plug-in hybrid SUVs, such as the BMW X5 and Volvo XC90, take things further with larger batteries that allow for full-electric driving over significant distances, often well over 50 miles, making them ideal for short commutes or city driving with the backup of a petrol engine for longer trips.

Plug-in hybrid cars can reduce fuel consumption to an absolute minimum, but which models are the best all-rounders and which ones should you avoid?

CR highlights the best plug-in hybrid cars and SUVs that scored well in our road tests and predicted reliability. Plus, the PHEVs with the worst fuel economy.
