

Panama Solar Water Pump

What is a solar water pumping system?

A solar water pumping system consists of a PV array, a motor, and a bore pump. Solar water pumping arrays can have permanent mounts, or installers may place them on passive trackers to increase pumping time and volume. Both AC and DC motors with centrifugal or displacement pumps are used in these circumstances.

Can a solar panel power a water pump?

A solar panel is capable of powering a water pump. It is especially beneficial as it runs the water pump at a more efficient and lower cost than other means of powering the water pump can.
