

# Pbq solar container battery

High quality new batteries to replace PBQ Batteries. Performance Guaranteed! 1 Year Warranty!

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

Battery Universe distributes a wide variety of premium quality replacement sealed lead acid batteries, and chargers for many different applications, and devices, including the full line of PBQ products.

The pbq cyclic batteries differ from standard batteries in several ways: the lead plates are made of another alloy and the grids are shaped differently than those found in standard VRLA batteries.

The pbq SC-series is designed for a functional life of 13 years under float conditions at 25°C, in accordance with the EUROBAT specifications or 15 years at 20°C.

PBQ's lithium batteries have high energy density, low weight and fast charging time. These batteries are ideal for cyclic applications such as electric vehicles, medical equipment and solar power systems.

As a rule of thumb, a VRLA battery will tolerate a lower cut-off voltage, without being damaged, at high current loads and short run times e.g at 2C, the voltage can drop to 1.35Vpc compared with a cut-off ...

pbq L 150-12 [10h] 10-year LongLife Battery Typical Applications: UPS Systems Emergency lighting systems Cordless cleaning equipment

General purpose batteries y. The batteries are designed with the cost and quality conscious user in mind offering an excellent price/performance ratio. pbq has a full series of 6 and 12 Volt models available ...
