

Philippines cebu air compression energy storage project

Integrated energy utility Aboitiz Power has kicked off a 30MW hybrid battery energy storage system (BESS) project in the Philippines. The company said on Wednesday (16 July) that ...

The facility, designed to store excess energy for use during peak demand, is expected to enhance grid stability, reduce reliance on fossil fuels, and improve energy security across the province.

Slated for commissioning in the first half of 2026, the facility is one of the first large-scale energy storage systems in Central Visayas. It aims to support rising power demand from industries ...

The project broke ground on Thursday, July 17, and is scheduled for commissioning by the first half of 2026. It is expected to enhance energy reliability in the Visayas grid and support the ...

The East Asia Utilities Corporation (EAUC) facility at the Mactan Economic Zone in Lapu-Lapu City, Cebu. This site is set to host a hybrid Battery Energy Storage System (BESS), poised to ...

Slated to begin operations in May 2026, the project is expected to boost grid stability by storing excess energy and dispatching it during peak demand or supply disruptions, an increasingly ...

Once operational by the first half of 2026, the BESS project seen to bolster electricity reliability for the growing Visayas economy.

The project is slated for commissioning in the first half of 2026 and is expected to be one of the first large-scale energy storage systems in Central Visayas, the company said in a media ...

Aboitiz Power Corp. will build a 30-megawatt (MW) hybrid battery energy storage system (BESS) project in the Mactan Economic Zone in Cebu, as part of efforts to enhance grid stability in ...
