

Photovoltaic glue board string welding machine accessories

What is a MBB cell Stringer?

The ultra-high speed MBB cell stringer is compatible with 166-230mm half-cut cells, 210-230mm 1/3 or 1/4 cut cells, 9BB-20BB, and is capable of manufacturing up to 7200 pcs./hr., with a Yield of string $\geq 97\%$. The automated Glass Loader is used for glass handling, loading, and placement.

What is Greenwell technology's vision for a PV manufacturing line?

Our vision at Greenwell Technology is that a PV manufacturing line should:

- o Be adapted for the current technology, to be competitive today.
- o Not be a limitation for future evolutions in cell/module technologies
- o Specific machinery for present and future technology with high performance.

What is auto trimming & glue dispensing machine?

The Automatic Trimming machine is used to trim/remove any excess materials from the module edges after the lamination process. This is used to flip modules 90°; under which operators can inspect and confirm the module quality. The Auto Framing and Glue Dispensing machine is used to grab and install glue-coated aluminum frames automatically.

The photovoltaic string welding machine uses infrared heating or laser welding technology to quickly weld the solder-coated ribbon to the main grid line of the battery cell to form a highly conductive ...

The best soldering output with minimal stress given to the solar cells, realizing high-quality photovoltaic modules with minimized breakages during the transformation process. The solar tabber ...

The quality of welding strip will directly affect the current collection efficiency of photovoltaic module, so it has a great impact on the power of photovoltaic module. The so-called photovoltaic welding strip is to ...

Shingled solar cell terminal head welding machine is an automatic equipment to do welding at both heads of solar module string cells with the ribbon. - We provide solar panel production line, full ...

Optimizing Photovoltaic Glue Board String Welding Machine Parameters for Peak Performance Imagine trying to solder hair-thin ribbons onto delicate solar cells without damaging their photovoltaic ...

Our vision at Greenwell Technology is that a PV manufacturing line should:

- o Be adapted for the current technology, to be competitive today.
- o Not be a limitation for future evolutions in cell/module ...

In the manufacturing process of photovoltaic modules, the series welding of solar cells is a key link in determining the performance and reliability of the modules. High-speed string er ...

Renovation of photovoltaic glue board string welding machine Which solar cells can be soldered with ecoprogetti Stringer machines? Ecoprogetti's stringer machines are designed to work with all the ...

Photovoltaic glue board string welding machine accessories

Custom Mesh Pressing Tool for Photovoltaic Equipment - 16BB Our custom mesh pressing tool is a premium accessory designed for use with photovoltaic equipment string welding machines. This ...

Our automated Solar/PV modules production line includes a complete set of equipment, such as solar cells laser cutting, string soldering, welding, glass loading, layup, laminating, framing, J-Box ...
