

# Photovoltaic panels produced in the United States

Which solar panels are made in the United States?

U.S. made solar panels include models from First Solar, Qcells (Georgia), Silfab Solar (Washington and South Carolina), Jinko Solar (Florida), and Canadian Solar (Texas and Indiana).

Where are solar panels made?

Leading U.S. solar panel manufacturers include First Solar, Qcells, Silfab Solar, Jinko Solar, and Canadian Solar's U.S. operations. Their factories in states like Ohio, Georgia, Texas, Florida, and South Carolina produce high-efficiency solar panels made in the USA that qualify for federal incentives.

Who makes the most solar panels in America?

Module Assembly: This represents the strongest segment of US solar manufacturing, with over 51 GW of annual capacity across dozens of facilities nationwide. First Solar remains America's largest solar manufacturer, specializing in cadmium telluride (CdTe) thin-film technology.

Which solar companies are based in America?

Although only one of the top five manufacturers (First Solar) is fully U.S.-based, many other American companies are expanding their solar manufacturing operations. Smaller firms like SEG Solar, Solar4America, and Mission Solar continue to grow, while new factories are opening across the country.

Find up-to-date statistics and facts on the solar photovoltaic industry in the United States.

For solar contractors working in this volatile environment, partnering with U.S. solar panel manufacturers is helpful. Using solar panels made in the USA may provide more consistent pricing, ...

Solar energy is a great way to cut down on power costs. In this article, we share the best American made solar panels across a wide range of price points.

While most solar projects in the United States use imported panels, there are more U.S. solar panel manufacturers than you might think.

First Solar: The leader in thin-film technology First Solar is the largest solar panel manufacturer in the United States, specializing in cadmium telluride (CdTe) thin-film solar panels. ...

The United States has experienced a remarkable transformation in solar manufacturing, driven primarily by the Inflation Reduction Act of 2022 and creating over 33,000 manufacturing jobs ...

What American companies are making solar panels? There are several American companies that manufacture solar panels in the United States. Some of these companies include: 1. ...

Discover the leading 20 U.S. solar manufacturers driving clean energy in 2025. Explore company info,

# Photovoltaic panels produced in the United States

specialties, and contact details.

A current list of U.S. solar panel manufacturers that produce solar panels for the traditional American residential, commercial and utility-scale markets.

This map provides information about all of the solar photovoltaic (PV) manufacturing facilities in the United States and how they contribute to the solar supply chain.
