

Photovoltaic solar power generation sites

Here we provide a global inventory of commercial-, industrial- and utility-scale PV installations (that is, PV generating stations in excess of 10 kilowatts nameplate capacity) by using a...

This project is one of the key agricultural photovoltaic power generation projects in Wanning City, making full use of the local barren slopes and abundant solar energy resources, transforming natural resource ...

This map provides information about all of the solar photovoltaic (PV) manufacturing facilities in the United States and how they contribute to the solar supply chain.

Welcome to the Global Solar Atlas. Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for selected sites.

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

See the locations of the major solar systems identified by this research on our interactive map.

Most are individual photovoltaic power stations, but some are groups of co-located plants owned by different independent power producers and with separate transformer connections to the grid.

Find a list of solar photovoltaic plants that are currently considered the largest on the globe. We have listed the ground-mounted utility-scale stations, which have already been connected to the power grid and are currently ...

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

Check out the biggest solar farms around the world, from Egypt and the UAE to India and China.
