

# Power Generation Solar Wholesale Quotes

How much does solar power cost?

The weighted average wholesale price for solar PV-generated electricity was \$83 per megawatt-hour (MWh) in 2019, more than double the price paid to producers for electricity generated by wind, fossil fuels, or nuclear. The higher average wholesale price for solar PV relative to other technologies is partly driven by geography and timing.

Why are wholesale electricity prices higher?

Wholesale electricity prices are generally higher when electricity demand within an area is greater. Because consumer demand for electricity varies throughout the day, the time of day when generation occurs also influences wholesale prices.
