

The overall objective of the program is to support cities in Kosovo to develop along a more sustainable trajectory and make them more livable.

These cities prioritize sustainable practices in various aspects, including energy consumption, transportation, waste management, green spaces and building design.

Make mindful choices to reduce your environmental footprint, support conservation efforts like the Bear Sanctuary, and engage in eco-friendly practices. Your choices contribute to Kosovo's sustainability.

A shared vision to harness the potential of integrated, climate-smart city planning to achieve climate and environmental goals, nurture human wellbeing and be cost-effective underpinned Pristina's cross ...

Pristina grapples with a myriad of pollution issues that significantly impact the environment and public health. From air and water pollution to waste management challenges, the city faces complex ...

To confirm this hypothesis, Prishtina is studied using a set of fifteen principles of green urbanism, which serves as a tool to assess Prishtina's sustainability principles. The results...

A core part of the process had been the development and agreement of a new Green City Vision that encapsulates where Pristina wants to be in terms of achieving a more sustainable and ...
