

# Recent price trends of photovoltaic brackets

The Photovoltaic Bracket Market Trends indicate increased adoption of modular and pre-assembled bracket systems, reducing installation time by 28-35% per project.

While aluminum brackets maintain popularity in coastal areas (15-20% market share), recent price fluctuations in carbon steel (&#165;4,550-5,200/ton) have revived interest in hybrid systems.

The global photovoltaic (PV) bracket market, currently valued at \$980 million in 2025, is poised for robust growth, exhibiting a compound annual growth rate (CAGR) of 8.4% from 2025 to 2033.

o The Global Photovoltaic Bracket Market is expected to witness a significant growth rate of 7.2% CAGR from 2025 to 2035, driven by increasing adoption of solar energy and advancements in bracket ...

The Global Solar Photovoltaic Bracket Market size was valued at USD 22,288.47 Million in 2025 and is projected to reach USD 26,278.2 Million in 2026, reflecting a sharp year-on-year ...

With an expected CAGR of 18.3% from 2023 to 2030, the market is not only responding to increased solar installations but is also adapting to meet evolving regulatory standards and consumer preferences.

Declining PV panel costs make solar energy increasingly competitive, leading to wider adoption and higher demand for supporting infrastructure, including brackets.

These technological improvements not only enhance the efficiency of solar power generation but also drive the need for robust and versatile photovoltaic brackets. Additionally, the declining costs of solar ...

In August, high-efficiency modules dropped to EUR0.12 per watt, marking an all-time low for the sector. Prices for photovoltaic modules in 2024 continue to fall. According to the monthly index ...

Solar photovoltaic panel prices Average price of solar modules, expressed in US dollars per watt, adjusted for inflation.
