

# Small Solar Storage Cabinet Installation Payment

Should I pay for my solar investment in cash?

Given the relatively high interest rates, solar.com recommends homeowners pay for their solar investment in cash if they can. This will achieve the lowest value of solar power possible and is a safe place to invest money in an otherwise highly volatile market. But, for homeowners who are looking to finance their solar, what are the best options?

Should homeowners install solar panels in 2025?

Homeowners installing solar panels and batteries in 2025 are smart to try to get ahead of tariffs, utility rate increases, and the risk of the solar 30% Federal Investment Tax Credit going away early. However, they're faced with interest rates that are significantly higher than they were just a short couple of years ago.

Should you buy down a solar loan?

Although there are many different types of solar loans available, the key question homeowners should ask themselves is whether they want to "buy down" their rate or not. Solar loans that advertise low APRS, such as 2.99 or 3.99, typically come with a 30-40% premium to buy down the rate.

Should you buy a solar loan with low APRS?

Solar loans that advertise low APRS, such as 2.99 or 3.99, typically come with a 30-40% premium to buy down the rate. So, the homeowner is effectively borrowing more money to get a lower interest rate.
