

With a substantial 78% of Americans supporting the expansion of solar farms, many hope that this technology can steer clear of the culture wars surrounding climate change.

Since the big domestic policy bill that was recently passed cut the knees out from under federal support for sun, wind and batteries, how long will that dark age last, and how much damage ...

Despite solar's rapid growth, uncertainty surrounding tax incentives and regulatory changes under the administration has raised concerns about a potential slowdown. Opposition to solar farms has ...

While Trump's stance on wind power has been unequivocally negative, his position on solar remains enigmatic. Despite sporadic endorsements of solar technology, Trump's ...

By some measures, the culture wars are starting to encroach on Americans' opinions about solar. Republican support for new solar farms slumped from 84 % to 64 % between 2020 and ...

Many are hoping that the technology -- which is broadly popular among Americans, with 78% supporting developing more solar farms -- can manage to stay out of Trump's culture wars over ...

Many are hoping that the technology -- which is broadly popular among Americans, with 78 % supporting developing more solar farms -- can manage to stay out of Trump's culture wars ...

For example, a tenant farming family in Yorkshire is about to lose 110 acres of their best arable land - half their farm - to solar panels, without any compensation.
