Solar container energy storage system for large electricity users in Latvia

Latvia"s largest single-site solar plant begins operating The 120.8 MW project, built by Lithuanian renewables developer Green Genius, is the largest single-site project in the Baltics.

As we approach Q4 2025, industry watchers are keeping tabs on Latvia"s first gigafactory for battery cells. When operational, it"ll slash import costs by 60% and create 800+ skilled jobs.

European Energy has announced the successful securing of EUR37.9 million in long-term project financing from Luminor Bank to develop a hybrid solar and battery energy storage project in ...

The battery system includes six battery containers, three inverter/transformer container and one distribution point container, providing a total electric capacity of up to 20 MWh.

This project marks a critical milestone for Latvia, as it combines a utility-scale solar park with a large-scale BESS. The integration of battery storage is a game-changer for the grid.

Energy storage systems are an essential element of Latvia"s path towards a sustainable and energy-independent future. The importance of these technologies is being recognized and ...

Greensun is pleased to announce the successful shipment of a 20ft containerized energy storage system to a client in Latvia. The system is a fully integrated solution, ...

The new system has a capacity of 20 MWh, enabling the park to store surplus energy generated during periods of high wind and supply it back to the grid when required.

Once operational, it will be among the most advanced hybrid renewable facilities in Latvia. The storage system is designed to support grid stability, balance electricity supply and ...

On November 1 Latvia"s largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in ...
