

With 1,800+ annual sunshine hours and a growing renewable energy market, Zagreb offers significant potential for solar photovoltaic (PV) systems. Let's break down what makes this city a prime location:

Residents of Zagreb have a digital platform for assessing the solar potential of their roofs. In addition to the investments, commercial projects are being developed through the company ...

Integrating photovoltaics into the grid remains a key priority for Croatia's renewable energy sector. This calls not only for greater grid flexibility and digitalisation, but also for storing solar ...

Discover how Solar Flex Croatia 2025 will advance solar energy in Southeast Europe by addressing key challenges in grid capacity, policy, and infrastructure investment.

Contracts are now in place, or in progress, for 16 MW more, with construction of 10 MW on around 200 buildings scheduled to start this year. The mayor called it the largest public solar ...

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 29 locations across Croatia. This analysis provides insights into each city/location's potential for harnessing solar ...

SolarPower Europe and Renewable Energy Sources of Croatia (RES Croatia) have signed a strategic partnership to support solar energy growth in Croatia and the wider region.

Renewable sources supply around 30% of Croatia's energy needs, but only two percent is solar energy. The potential for solar energy is estimated at 6.8GW (majority in utility-scale or ground system PV ...

Bringing together developers, investors, policymakers, and technology providers, the summit addresses the Balkans' key solar challenges and emerging opportunities.

This article explores market dynamics, innovative technologies, and practical strategies for businesses looking to navigate this promising sector. Whether you're a supplier, distributor, or project developer, ...
