

Solar panel market share ranks second globally

What is the global solar PV panels market size?

The global solar PV panels market size was exhibited at USD 170.26 billion in 2023 and is projected to hit around USD 360.83 billion by 2033, growing at a CAGR of 7.8% during the forecast period of 2024 to 2033. The thin-film segment occupied a dominant market share of over 43.0% in 2023.

Who dominated the global solar market in 2024?

In 2024, China once again dominated the global solar market, installing an impressive 329 GW, over six times the capacity added by the second-ranked United States, and exceeding the combined total of all other top 10 markets.

What is the market share of solar PV panels in 2023?

Based on application, the industrial segment accounted for a dominant share of over 40.0% in solar PV panels sector in 2023. Companies in the commercial and industrial sectors are among the major consumers of solar photovoltaic panels owing to the large-scale demand for green energy.

Which countries produce the most solar panels in the world?

Asia-Pacific leads the global solar PV panels market, with China, India, and Japan accounting for the lion's share of installed capacity. China alone contributes over one-third of global PV deployment and dominates solar manufacturing, controlling over 70% of module production.
