

Solar power generation host arrives

Under the name of Project Matador, the idea is to turbo-charge domestic AI capacity with a new dedicated gigascale grid. The sprawling campus will be front-loaded with nuclear and natural ...

Escalante Solar is now delivering 200 MWac of clean solar generation, enough power to serve an estimated 63,000 homes, to Tri-State's members, including 11 electric cooperative ...

Near real-time data supports robust growth of solar in ComEd region

The Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada.

Solar energy technology doesn't end with electricity generation by PV or CSP systems. These solar energy systems must be integrated into homes, businesses, and existing electrical grids with varying ...

Solar power is the fastest-growing source of new electric generating capacity in the United States, driven by large-scale solar photovoltaic (PV) projects built by electric utilities and ...

HOST Park is the site of a new solar test bed funded by the National Renewable Energy Laboratory (NREL). The test bed will allow to compare various solar modules' power generation, energy storage ...

OverviewDescriptionFossil fuel consumptionEconomic impactPerformanceEnvironmental impactsIn popular cultureExternal linksThe Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada. It was slated to close in 2026, but that decision has been reversed by the California Public Utilities Commission. The facility derives its name from its proximity to Ivanpah, California, which lies within the Mojave National Preserve

Solar is a great renewable energy choice and is playing an important role in how Duke Energy provides electricity to customers. Find out how.

The sprawling German lignite mines could host over 4 GW of solar, which is a small share of the country's total solar capacity, but a significant stride for a coal-dependent region.

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

Solar power generation host arrives
