

Solar power station compensation standards

Solar panels work through the photovoltaic (PV) effect. When sunlight hits the panels, it creates an electric current that is first used to power electrical systems in your home.

Effective October 1, 2021, §24-d was added to Article 8 of the Labor Law establishing prevailing wage requirements for certain renewable energy systems.

Solar energy is radiant energy from the sun--a fully renewable energy resource. We use the solar resource to provide daylight, electricity, and heat in four ways (in order of prevalence): Solar PV is ...

While enforcing prevailing wage requirements under AB 2143 aims to ensure fair compensation for workers, it introduces potential implications for project costs and development ...
