

What are the patents for communication base station energy storage systems

According to an embodiment of the disclosure, by defining a signal transmission method for a base station in a mobile communication system, the problem of excessive energy consumption can be ...

An energy storage system and energy storage method for a communication base station, the energy storage system comprising: a first energy storage unit (11) comprising a...

This patent search tool allows you not only to search the PCT database of about 2 million International Applications but also the worldwide patent collections. This search facility features: flexible search ...

This patent search tool allows you not only to search the PCT database of about 2 million International Applications but also the worldwide patent collections. This search facility features: ...

The method for energy saving control of a base station in the embodiment of the present disclosure is applied to a network system, where the network system includes: a base station and ...

A system is disclosed, comprising: a solar panel; a battery; an electric power supply source; a wireless fronthaul access point coupled to a radio mast and in communication with a remote...

The present invention relates to a base station apparatus, a terminal apparatus, a communication method, and a computer-readable storage medium and, more particularly, to a ...

The outdoor heat exchanger (4) is connected with the coolant heat exchanger (3). The energy storage cooling system has the advantage of energy saving.

Therefore, an object of the present invention is to provide a base station, a wireless communication system, and a communication method that can solve the above-described problems.

An energy storage system and method for a communication base station and is related to the communications field, to prolong the life cycle of the energy storage system, reduce the...
