

# What are the wind power generation sites in the north

In this article, we will explore the top destinations in the United States that are ripe for harnessing the power of wind energy, offering insights into the factors that make these locations ideal ...

o List of offshore wind farms in the United States  
o List of U.S. states by electricity production from renewable sources  
o List of wind turbine manufacturers  
o Renewable portfolio standard

Interactive map of wind farms in the US. View the largest projects, track new developments, and explore capacity data across all states.

The United States Wind Turbine Database (USWTDB) provides the locations of land-based and offshore wind turbines in the United States, corresponding wind project information, and turbine technical ...

Using Texas as the metric is a great idea, as it is not only the largest state in terms of the number of turbines, but they are also extremely modern and efficient at generating wind power.

Find maps and charts showing wind energy data and trends.

Camp Creek I is a 200 MW wind farm under development by RWE. The project is located in McDonough County, Illinois and will generate enough locally produced electricity to power more than 46,000 ...

Favorable sites include the tops of smooth, rounded hills; open plains and water; and mountain gaps that funnel and intensify wind. Wind speeds are generally higher the greater the ...

The Wind Power is a comprehensive database of detailed raw statistics on the rapidly growing sphere of wind energy and its supporting markets.

North Dakota and Wyoming lead per capita generation of electricity from wind. This is a list of large wind farms in the United States. Many of the wind farms in the United States are located in the Great Plains.

Wind energy generation varies by state. Discover the states with the most wind energy in Choose Energy's February 2026 Wind Generation Report.
